

New Zealand Migrant Settlement and Integration Strategy Outcomes indicators dashboard report 2022

Overall progress:

Outcome 1: Employment Working-age migrants have work that matches their skills and **New Zealand-ready qualifications**

In 2022, 83% of employed principal skilled applicants reported that their main job matched their skills and qualifications. This is a decrease from the previous years, but the outcome still remains high over time. The rate for employed secondary skilled applicants is much lower in comparison (59%) but it has remained stable.

In the year ended December 2022, 80% of recent migrants are in employment compared with 69% of the New Zealand working-age population. The employment rate of recent migrants has continued to show an increasing trend.

The rate of former student visa holders with Bachelor's degree or higher who transitioned to NZ Residence within three years has increased (23% up from 15% for the previous cohort) but they are still more likely to transition to a work visa (28%).

Success indicator 1: Increased proportion of employed principal and secondary applicants whose occupations in New Zealand match their skills and New Zealand-ready qualifications

Proportion of employed migrants who reported their occupation matched their skills and qualifications

those for New Zealanders

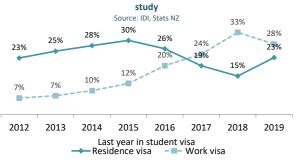

Employment rate of recent migrants and the New Zealand-born working-age population

Success indicator 3: Increased transition rate from study to residence for international students with Bachelor's level qualifications and above

--- Recent migrants --- New Zealand overall

Proportion of former student visa holders with least a Bachelor's degree that gained NZ residence 3 years post-

Overall progress:

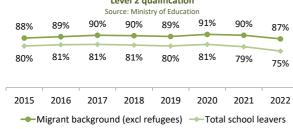

Outcome 2: Education and Training Migrants achieve educational and vocational qualifications

In 2022, 87% of overseas-born migrant school leavers (with at least 5 years in ESOL) attained at least an NCEA Level 2 qualification. This is higher than the average for all school leavers (75%).

Recent migrants are more likely to have a Level 4 or above qualification (or equivalent) compared with the New Zealand-born population. In the year ended December 2022, 60% of recent migrants aged 25-64 years have a qualification of Level 4 or higher compared with 50% for the New Zealand-born population.

Success indicator 1: Increased proportion of migrant school leavers who achieve NCEA level 2 or higher after five years in the New Zealand

Proportion of migrant school leavers with at least NCEA Level 2 qualification

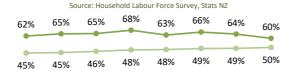

Note: These are migrant school leavers who have been in the New Zealand education system for five years or more, as defined by their enrolment in ESOL.

Success indicator 2: Employment rates for recent migrants are similar to

Success indicator 2: Increased proportion of 25-64 year old recent migrants who have a Level 4 or above qualification on the New Zealand Qualifications Framework

Proportion of recent migrants aged 25-64 years with Level 4 or above qualifications

Dec-15 Dec-16 Dec-17 Dec-18 Dec-19 Dec-20 Dec-21 Dec-22 -- Recent migrants -- New Zealand-born

Employment rate: The proportion of the working-age population who are employed for at least one hour per week.

Principal applicant: The main applicant for New Zealand residence on an application

Recent migrant: Migrant who has been living in New Zealand for five vears or less. Secondary applicant: The partner and/or dependent children included

on a principal applicant's residence visa. Working-age population: Usually resident in New Zealand aged 15 vears and over.

ESOL: English for Speakers of Other Languages

NCEA: National Certificate of Educational Attainment

NZGSS: New Zealand General Social Survey

Overall progress:

Outcome 3: English Language Migrants confidently use English in their daily lives

Most recent migrants can speak English well. In 2022, 91% of recent migrants reported that they could have a conversation about everyday things in English well or very well. This has remained generally stable

In 2022, 56,400 school children from a migrant background received ESOL support. Overseas-born (non-refugee) migrant children make up 47% of those who received ESOL funding that year.

More than half (55%) of recent migrants with pre-purchased English language tuition entitlement ending in 2022 used up all of their ESOL tuition. The rate of full uptake has generally improved over time.

In 2022, there has been an increase from the previous year on the share of TEC-funded ESOL delivery that went to migrant enrolments in ESOL

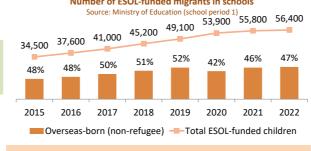

Success indicator 1: Increased proportion of recent migrants who can have a conversation about everyday things in English

Proportion of recent migrants who can have a conversation in English well

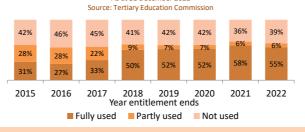

Success indicator 2: More migrant children are using school-funded

Number of ESOL-funded migrants in schools

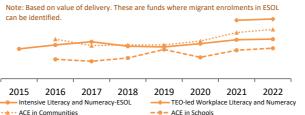

Success indicator 3: Increased uptake of prepaid English language tuition

Uptake of pre-paid English language tuition As at 31 December 2022

Success indicator 4: Utilisation of TEC-funded English language support by migrants with English language needs

Proportion of migrant delivery in ESOL

Overall progress:

Outcome 4: Inclusion Migrants participate in and have a sense of belonging to their community and to New Zealand

Most recent migrants feel a sense of belonging to New Zealand. In 2022, 87% of recent migrants felt that New Zealand is their home. Responses have generally remained stable over the years, but this is a small decrease from the previous year.

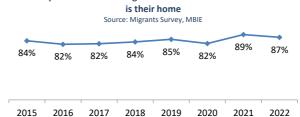

In 2022, 67% of recent migrants said they belonged to at least one social group or club. This is a small increase over the last year.

There has also been a marked increase in the share of recent migrants who voted. In the 2020 general election, 83% of eligible recent migrants said they voted, up from 71% who voted in the 2017 general election.*

In 2021, 23% of recent migrants reported they had experienced discrimination in the last 12 months, compared with 21% for the overall

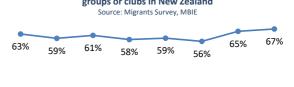

Success indicator 1: Increased proportion of recent migrants who feel a sense of belonging to New Zealand

Proportion of recent migrants who felt that New Zealand

Success indicator 2: Increased proportion of recent migrants who belong to social networks and groups (including sports groups)

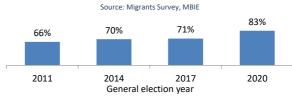

Proportion of recent migrants who belong to social groups or clubs in New Zealand

2015 2016 2017 2018 2019 2020 2021 2022

Success indicator 3: Increased proportion of recent migrants with residence who voted in general elections

Proportion of recent migrants who voted in the general elections

Success indicator 4: Reduced proportion of recent migrants who have experienced discrimination in New Zealand

Proportion of recent migrants who experienced discrimination over the last 12 months

Overall progress:

Outcome 5: Health and Wellbeing Migrants enjoy healthy lives and feel confident and safe

Most recent migrants feel safe in New Zealand. In 2022, 71% of recent migrants reported feeling safe from crime, although this has markedly decreased compared with the previous years.

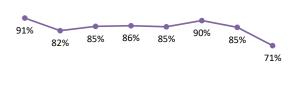

Recent migrants were less likely to say they had crime committed against them than the overall New Zealand population. In 2021, 9% of recent migrants had crime committed against them in the last 12 months compared with 12% for the overall population.

The majority of recent migrants have access to primary health care. Approximately 93% of recent migrants were enrolled in a primary health organisation (PHO) within five years of arriving or approval for residence. This has remained stable over the years.

Success indicator 1: Increased proportion of recent migrants who feel

Proportion of recent migrants who felt safe in New Zealand

2015 2016 2017 2018 2019 2020 2021 2022

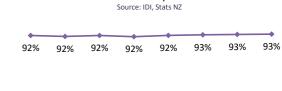

Success indicator 2: Fewer recent migrants are victims of crime

Proportion of recent migrants who had crime committed

Success indicator 3: Increased proportion of recent migrants enrolled

Proportion of recent migrants who are enrolled in a PHO within five years

2010 2011 2012 2013 2014 2015 2016 2017 Cohort
