

VISA PAK ISSUE 424 — 06 DECEMBER 2019

OFFSHORE VERIFICATION CONTRACT

The existing contract for the provision of offshore verification services expired on 1 December 2019.

The Product Service and Contract team along with representatives from the Risk and Verification team undertook a tender process for the continuing provision of these services.

DataFlow Ltd were the successful tenderer and a new contract has been signed which took effect from 2 December 2019.

As DataFlow Ltd held the previous contract to provide these services the process for requesting verification has remained unchanged.

However, the Product Service and Contracts team will be working with DataFlow Ltd on the possibility of establishing a portal for the submission of requests and receipt of verification reports in 2020.
